AI Taxonomy

Deep Learning

The subset of machine learning composed of algorithms that permit software to train itself to perform tasks, like speech and image recognition, by exposing multilayered neural networks to vast amounts of data.

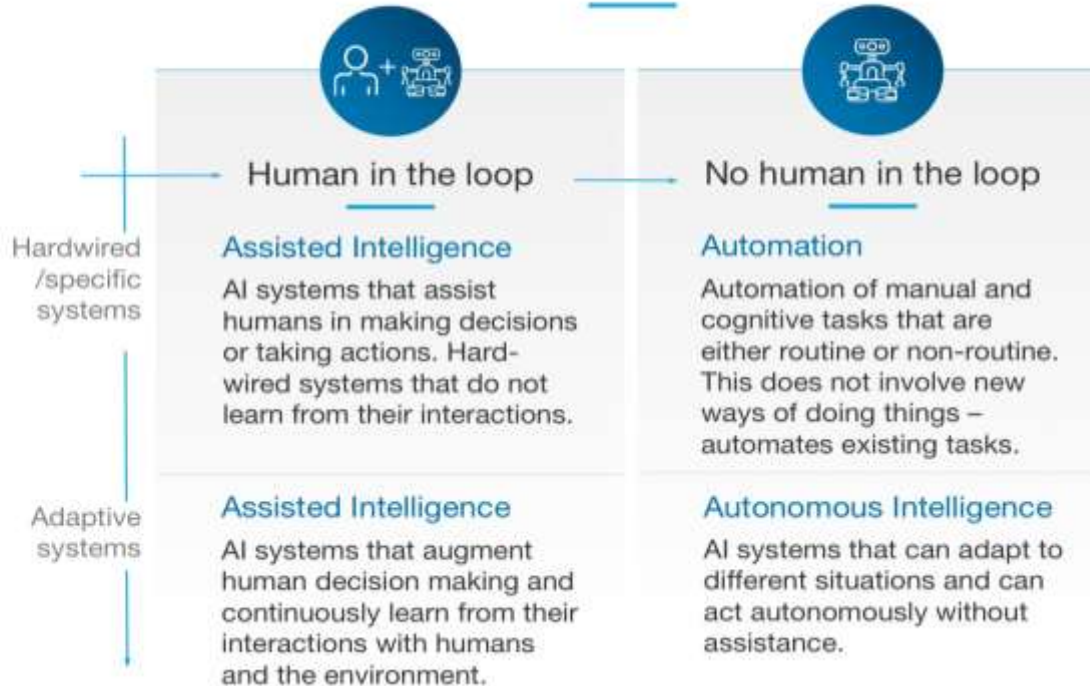

Machine Learning

A subset of AI that includes abstruse statistical techniques that enable machines to improve at tasks with experience. The category includes deep learning.

Artificial Intelligence

Any technique that enables computers to mimic human intelligence, using logic, if-then rules, decision trees, and machine learning (including deep learning)

AI works in 4 ways

Senior Software Engineer, Frontend

Job listing for an Engineering role in Seattle

Draft Shared Finished

We believe that the future of business documents is knowing how they'll perform before they're published. We are creating the software to power this revolution. Our AI-powered text platform is delighting customers, and we're looking for creative and passionate frontend engineers to join our Seattle team.

You have deep experience building scalable, human-centric web frontends and are looking for the chance to help create a ground-breaking and remarkable user experience that is changing how people write.

We'd love to hear from you if:

98 Textio Score Outstanding

- Needs more 'you' statements
- Listing is a bit short
- Too many adjectives
- Sentences are too short
- Too much passive language
- Not quite enough bulleted content
- Uses repetitive wording
- Could use more engaging questions

Slightly feminine tone
